2.6.2. Attainment of POs and Cos are evaluated.

Response: The course outcomes are defined by respective staff member using Blooms taxonomy in the planning stage of teaching learning process cycle. The course is taught in accordance with the achievement of the CO. In the analysis phase of teaching learning process cycle, the attainment of CO's and PO's is done. The results are analyzed and appropriate action is taken to ensure continuous improvement. CO's attainment is calculated post examination and the result is recorded (Direct method). Then, a correlation is established between COs and POs on the scale of 0 to 3, 0 being no correlation, 1 being the low correlation, 2 being medium correlation and 3 being high correlation. Extension activities, Co-curricular & extra curricular activities help in attainment of CO's too (Indirect method). Based on the result of attainment of CO's, the CO's for the next term are either upgraded or the pedagogical technique is revised for effective attainment. The PO attainment is calculated on the basis of well updated alumni database. Feedbacks taken from alumni, employers, faculty also help in PO attainment calculation. The institution has also developed a CO-PO/PSO & PEO assessment and attainment process manual for the benefit of staff. At the beginning of every academic session, subject orientation is arranged wherein the faculty explain the CO's of the subject allotted to them and the same is also reflected in their academic records.

Evaluation of Course Outcomes

Attainment of course outcomes are evaluated as per following table

Method	Tools for Assessment	% Contribution	
Direct (Internal + External)	Internal Sessional Examination Including Continuous Assessment	30	80 %
	Annual University Examination	70	
Indirect	Course Exit Survey	20 %
