Session Details

Introduction to clinical Research, Domains within Clinical research,

The course included Good Clinical Practice (GCP) is an international ethical and scientific quality standard for the design, conduct, performance, monitoring, auditing, recording, analyses and reporting of clinical trials. It also serves to protect the rights, integrity and confidentiality of trial subjects. It is very important to understand the background of the formation of the ICH-GCP guidelines are used in clinical trials throughout the globe with the main aim of protecting and preserving human rights.

Clinical Data Management (CDM) , SAS & Certificate Financial Literacy

Clinical Data Management (CDM) is a critical phase in clinical research, which leads to generation of high-quality, reliable, and statistically sound data from clinical trials. This helps to produce a drastic reduction in time from drug development to marketing. Team members of CDM are actively involved in all stages of clinical trial right from inception to completion. They should have adequate process knowledge that helps maintain the quality standards of CDM processes. Various procedures in CDM including Case Report Form (CRF) designing, CRF annotation, database designing, data-entry, data validation, discrepancy management, medical coding, data extraction, and database locking are assessed for quality at regular intervals during a trial.

Pharmacovigilance (PV), Medical Writing

Pharmacovigilance (PV) plays a key role in the healthcare system through assessment, monitoring and discovery of interactions amongst drugs and their effects in human. Pharmaceutical and biotechnological medicines are designed to cure, prevent or treat diseases; however, there are also risks particularly adverse drug reactions (ADRs) can cause serious harm to patients. Thus, for safety medication ADRs monitoring required for each medicine throughout its life cycle, during development of drug such as pre-marketing including early stages of drug design, clinical trials, and post-marketing surveillance. PV is concerns with the detection, assessment, understanding and prevention of ADRs.

Clinical Monitoring & Operations, Paper TMF & eTMF:

Clinical trial sponsors face significant obstacles in the assembly of TMF, especially when dealing with broad, multinational, multicentre surveys; with all newly introduced archiving

Siddhant College of Pharmacy
Sudumbare, Tal.-Maval,
Dist.-Pune 412109.

technologies, it is becoming progressively difficult to ensure that TMF is complete. It is expressed specifically in the number of inspection findings reported and issued by the EMA. Wirth in life sciences sector, fulfilling the standards of regulatory authorities through their supervision of the planning, operation, documentation and monitoring of clinical trials is also intended to include the required confidence that the privileges, health and well-being of trial subjects are secured and that the outcomes of the trials are credible. The Trial Master File (TMF) is the foundation of what is being reviewed by inspectors to show conformity by sponsors, trial monitors and investigators with the Good Clinical Practice (GCP) standards as well as with other relevant regulatory criteria.

Medical Coding & Certification, Regulatory Affairs

Regulatory affairs helps professionals understand more about pharmaceutical and medical device regulations, which enhances the safety and effectiveness of health care efforts at hospitals, clinics and other health care facilities.

Scope of foreign language in C.R.

Language is an essence of communication which can remove the boundaries of two different people who belongs to different countries, culture, states, religion. And now it's becoming essential at globally to know each other languages for communication and even for a job opportunities. The scope in foreign languages is increasing internationally.

Assessment and mock Interviews:

These skills are necessary for getting, keeping and being successful in a job. Some of the topics that will be covered here are – Communication, Teamwork, Problem solving, Initiative and enterprise, Planning and organizing, Self-management, Learning, Technology, CV writing, Group discussions, how to face interview, public speaking, presentation skills etc.

Students gained and enjoyed the activity-based sessions. Various topics like Decision Making, Negotiation Skills, Creative Thinking, Resume Writing, Interview etc. were covered.

Courses started in the month of March 2023 and completed in the month of May 2023. In total 30 students of the college got certification under these courses.
