2-Days Webinar

on

"Recent Advances in Pharmaceutical, Biological and Chemical Sciences"

on 15th -16th Oct 2022- 9.00 am till 6.00 pm

About Us

About Siddhant College of Pharmacy (SCOP), Sudumbre, Pune, MS.

Siddhant College of Pharmacy (SCOP) is right choice for your important step of graduation and post-graduate education, and you will never regret it. You will learn the science of pharmacy and along with it you will become a motivated Professional that matters. The teaching-learning process at Siddhant college of Pharmacy emphasizes on personalized attention where students of all socioeconomic backgrounds feel comfortable. Students at Siddhant enjoy the process of graduation and are highly motivated. Systems are designed to encourage active involvement for developing and expressing the creative and artistic needs. Along with graduation we emphasize on development of personality and right attitude as a Professional. We treat our student as professional right from day one and mold them to utilize their optimum potential to quench the thirst of nation. We are reputed for excellent results and best placement of our students in the field of industry, marketing and research. We have excellent research facilities where we have tie-up with industries. We have highly qualified team of faculty with low salaries and other persuading incentives to meet the need of higher education.

About Aries Foundation of Science, Education and Research (AFSER), Kothrud, Pune, MS.

AFSER has all the statutory and mandatory approvals from Govt. of India. AFSER has objectives to promote Science, research, education, training and development activities for skilled Indian youth and workforce in fields of Pharmacy, Engineering, Science, Medical, Dental Sciences. It aims to fill the gap between educational needs and actual practical approach of the students of science streams of all kinds, towards the society. Also, it promotes conducts various philanthropic online and offline programs. AFSER has partially sponsored SCOP to conduct 2-Days Webinar on "Recent Advances in Pharmaceutical, Biological and Chemical Sciences" on 15th -16th Oct 2022.

About Conference "2-Days Webinar on "Recent Advances in Pharmaceutical, Biological and Chemical Sciences" on 15th -16th Oct 2022"

The conference shall start also highlight the significance of recent advances in Pharmaceutical, Biological and Chemical Sciences.

Speakers/ Resource Persons

Table with 2 columns: Name, Designation. Lists speakers and resource persons for the webinar.

Online Poster Presentation

Abstracts for Conference Proceedings to be submitted on

• Email: atecofoundation02@gmail.com with heading "Submission of Abstract"

• Email: atecofoundation03@gmail.com with heading "Submission of Abstract"

Author Guidelines:

Title: 14 Font TNR, Author Names and Affiliations : 12 Font TNR Abstract: 12 Font TNR with Key words.

Top 16 papers shall be shortlisted for Oral Presentation and shall deliver a short Presentation online, out of which 8 papers shall be published free of cost.

FIRST 8 Ranking Papers will be published in Current Trends in Pharmacy and Pharmaceutical Chemistry, International Journal on IP Innovative Publications Platform Free of Cost

Online Forms Available at <https://forms.gle/bN7T2SWrxpG6Fk2m9>

Fees: 250/ Delegate to obtain certificate and Free of Charge if Certificate is not required.

No other Charges.

PRINCIPAL SIDDHANT COLLEGE OF PHARMACY, SUDUMBRE, PUNE-412 109

Introduction and Scope

Introduction and Scope

- Pharmaceutical Sciences or Pharmacy is the clinical health science that links medical science with chemistry and it is related with the discovery, production, distribution, sale and effective use, and control of medications and drugs. The practice of pharmacy requires extensive knowledge of drugs, their mechanism of action, side-effects, the actions, mobility and toxicity of the same drug. It requires knowledge of treatment and understanding of the pathological process, some laboratory tests. The scope of pharmacy practice includes many important roles such as dispensing and monitoring of medications, and it also includes more modern services related to health care. Including clinical services, increasing medications for safety and efficacy, and counseling drug therapy. The history, development, and the growth of drug therapy and the growing health professionals who deliver the care to patients from the benefits of the system, do not depend on which pharmacy in the first place is practiced in a pharmacy (this term is more common in the United States) or a chemical, health or more scientific or clinical facility through pharmacy in the world. In the United States and Canada, drug stores commonly sell medicines, as well as instrumental tests, such as diagnostic chemistry, after applying for the use products and equipment, and the industry, which includes analysis and production of pharmaceuticals and chemical engineering. The work of the pharmacist may be regarded as a profession of the modern sciences of chemistry and pharmacology prior to the formulation of the scientific method.
- Chemistry or chemical sciences is the scientific study of the properties and behavior of matter. It is a natural science that covers the elements that make up matter to the compounds composed of atoms, molecules and ions. These topics include: structure, properties, behavior and the changes they undergo during a reaction with other substances. In the course of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because of its position as a foundation for understanding both life and matter, and applied scientific disciplines at a fundamental level. For example, chemistry deals with the properties of matter (such as the formation of chemical bonds), how substances react to form new substances, how substances are separated, and how to control their synthesis. Chemistry addresses topics such as how atoms and molecules interact via chemical bonds to form new chemical compounds. There are four main types of chemical bonds: 1. ionic chemical bonds, in which atoms share one or more electrons; 2. covalent bonds, in which atoms share one or more electrons; 3. hydrogen bonds, in which atoms share one or more electrons; and 4. dipole-dipole interaction.
- Biological Sciences or Biology is the scientific study of life. It is a natural science with a broad base but has several underlying themes that tie it together as a single coherent field. For instance, all organisms are made up of cells that process biochemical information encoded in genes, which can be inherited to future generations. Another major theme is evolution, which explains the unity and diversity of life. Energy processing is also important to life as it allows organisms to move, grow, and reproduce. Finally, all organisms are able to regulate their own internal environments. Biologists are able to study life at multiple levels of organization within biology, each defined by the nature of their research questions and the tools that they use. One often studies the life cycle, the life cycle of multiple individuals within their generations, their questions, generate hypotheses, perform experiments, and then discuss findings about the world around them.

Our Mission

- 1) Siddhant College of Pharmacy fosters a learning-centered, research-oriented educational environment that encourages individuals to make positive lifelong contributions to global health.
- 2) We prepare professional students to provide compassionate pharmacist to society.
- 3) We inspire our students through innovative problem-based learning, rich experiential program, and inter-professional collaboration.
- 4) We foster a community of scholars who will further the body of knowledge in pharmaceutical, biomedical, and clinical sciences.
- 5) We strive to improve quality of life locally, nationally, and globally.

Objectives of Lecture Series:

- To create or engage interest in new area.
- To Impact student with knowledge about the career and job opportunities after the completion of pharmacy in various area.

INDUSTRY INSTITUTION EXPERT LECTURE SERIES

OUR VISIONS

Siddhant College of Pharmacy will lead the way toward effective global health care by developing innovative teaching practices, advancing research, practice and merging true entrepreneurial spirit with care and compassion.

THE FUTURE ENDEAVOUR

Pharmacy is a diverse and rewarding career with opportunities for patient care, scientific research and innovation. Alumni Association of Siddhant College of Pharmacy organized lecture series on career
